

LUBRIFORMANCE

The Lubrication Performance Company

GAS DOCTOR™

Gasoline Enhancer

DESCRIPTION:

Today's fuels have changed and not for the better. Ethanol blends and increased sources of moisture contamination have left many fuel distributors and end users in the dark and often with fuel supplies that are unusable.

Lubriformance Gas Doctor™ contains patented technology designed to meet the challenges of direct injection engine technology, while continuing to deliver excellent performance in the traditional port fuel injection platform.

Lubriformance Gas Doctor™ also incorporates a unique gasoline detergent package used at maximum levels providing increased fuel efficiency, reduced emissions and excellent deposit control. By utilizing this detergent package **Lubriformance Gas Doctor™** will not only prevent deposit formation, but it will also clean up deposits that have already formed.

Lubriformance Gas Doctor™ contains a highly effective moisture controlling agent to prevent phase separation in ethanol blended fuels and prevent damage to internal engine parts. This along with advanced rust and corrosion protection will ensure that fuel storage tanks and your engines working metal parts achieve maximum life and efficiency.

Lubriformance Gas Doctor™ contains a unique fuel stabilizing package, designed to protect your fuel system and fuel storage from issues taking place when your engine is not running. **Lubriformance Gas Doctor™** has also incorporated a new friction modifier, designed to increase fuel economy and power, while protecting your equipment from wear and higher operating conditions.

USES:

Lubriformance Gas Doctor™ should be used in regular and ethanol blended gasolines. Regular use of **Lubriformance Gas Doctor™** will provide maximum benefits to:

- Fuel Storage Systems
- Cars and Motorcycles
- Trucks
- ATV's and Tractors
- Boats and Marine Engines
- Generators and Stationary Equipment
- Lawn Equipment and Pressure Washers
- Both 2 and 4 cycle gasoline engines

BENEFITS:

Lubriformance Gas Doctor™ provides the following benefits:

- Dispersants reduce problems with moisture.
- Reduces friction.
- Up to E20 ethanol compatible.
- Helps to keep clean and clean-up intake valves and injectors.
- Optimized fuel economy.
- Maximized power and acceleration.
- Reduced emissions.
- Excellent combustion chamber deposit control.
- Cost effective corrosion control in all types of gasoline.
- Excellent performance in the ASTM D665A rust test.
- Stabilizes fuel.
- Extends the life of fuel storage tanks.

APPLICATION:

Lubriformance Gas Doctor™ treatment ratio is:

1 gallon per 400 gallons of gasoline

SPECIFICATIONS:

Density	7.5 lbs./gal at 60 F
Pour Point	<-30° F
Flash Point	120°
Appearance	Amber
