LUBRIFORMANCE

High Performance Fuel Treatments

TNT™ Premium Diesel Additives

Top performers for today's toughest diesel applications

AND

Ultra™ Premium Fuel Additives

Formulated for multi-functional fuel solutions

Ultra™ Premium Fuel Additives

Ultra-Fuel – 100% active ingredients with moisture controlling agents to remove free and emulsified water from fuel and fuel tanks. Adds lubricity. Prevents bacteria and algae formation. Prevents phase separation. Stabilizes Fuel. Can be used in Gasoline, ethanol blended gasolines, on and off-road diesel fuel, including biodiesel blends.

Ultra-Dri – 100% active ingredients to remove free and emulsified water from fuel and fuel tanks. Prevents rust and corrosion. Prevents bacteria and algae formation. De-ices fuel. Prevents phase separation. Reverses phase separated fuel. Can be used in Gasoline, ethanol blended gasolines, on and off-road diesel fuel, including biodiesel blends.

Sludge Hammer – 100% active ingredients with moisture controlling agents to remove free and emulsified water from fuel and fuel tanks. Removes sludge and sediment from diesel fuel and home heating oil. Effectively removes dead microorganisms from fuel after being treated with a biocide

Hum Out – Controls bacteria and fungi growth in oils and refined fuels. Reduces tank corrosion. Eliminates filter plugging. Can be used in in marinas, fuel supplies and storage depots, auxiliary diesel generators, home fuel, railroad diesel and other users of non-gasoline hydrocarbon fuels exposed to storage, humidity, or contamination.

Lubrilizer – A unique blend of acid neutralizers designed to reduce wear and increase performance. Highly concentrated moisture control agents prevent problems with water. Prevents phase separation. Contains a highly effective upper cylinder lubricant. Stabilizes fuel. State of the art additives will De-Gel or De-Ice Diesel Fuel. Can be used in Gasoline, ethanol blended gasolines, on and off-road diesel fuel, including biodiesel blends.

Gas Doctor – Is a new age gasoline enhancer that combines patented technology designed to meet the challenges of direct injection engine performance, with unique moisture control and fuel stabilizing agents.

TNT™ Premium Diesel Additives

TNT Summer Diesel Treatments

TNT-3K Extreme – is a multi-purpose diesel package giving significantly enhanced power, performance and protection to both on and off-road diesel fuels, as well as bio-diesel blends. Raises cetane up to 4 numbers. Controls moisture. Adds lubricity to ULSD. Prevents bacteria and algae formation. Contains HPCR detergent package for clean-up and keep clean performance. Improves storage stability.

TNT-3K – is a multi-purpose diesel package giving significantly enhanced power, performance and protection to both on and off-road diesel fuels, as well as biodiesel blends. Raises cetane 2-3 numbers. Controls moisture. Adds lubricity to ULSD. Prevents bacteria and algae formation. Cleans injectors. Improves storage stability.

TNT Winter Diesel Treatments

TNT-2K – is a multi-purpose diesel package giving significantly enhanced power, performance and protection to both on and off-road diesel fuels, as well as bio-diesel blends. Raises cetane 1-2 numbers. Lowers Pour Point and CFPP 20 – 30 degrees. Controls moisture. Adds lubricity to ULSD. Prevents bacteria and algae formation. Contains HPCR detergent package at the keep clean performance ratio. Improves storage stability.

TNT-Ultra – is a multi-purpose diesel package giving significantly enhanced power, performance and protection to both on and off-road diesel fuels, as well as bio-diesel blends. Raises cetane 2-3 numbers. Lowers Pour Point and CFPP up to 40 degrees. Controls moisture. Adds lubricity to ULSD. Prevents bacteria and algae formation. Contains HPCR detergent package for clean-up and keep clean performance. Improves storage stability.

TNT-Ultra with W.A.S.A – combines all the fabulous benefits of TNT-Ultra with the addition of Wax Anti-Settling Agent. Designed to give you maximum winter performance along with keeping wax crystals suspended in the fuel and preventing wax fallout.

Climate Change – is a diesel fuel cold weather rescue product designed to get you up and running quicker than anything else on the market today. With today's high wax fuel and increasing wax build up at the pick-up tube due to falling out of suspension, Climate Change™ gets your fuel system flowing again so you won't be stranded in freezing temperatures.
